Why choose Karndean Designflooring

Your space. Your needs. Your style.

Karndean
Designflooring

Beautiful naturally inspired designs that are affordable

Wood & Stone

Natural products that are affected by climate

VERSUS

The top 10 reasons to choose Karndean Designflooring

- 1 Realistic and beautiful replication of natural patterns, colours & grains
- 2 It's ambient to touch so it doesn't get too hot or cold
- 3 Stain resistant, so food, wine or pet messes are easy to clean up
- 4 Resists indentation from high heels and scuffing in high traffic areas
- 5 Not affected from changes in temperature, doesn't shrink, expand or curl
- 6 Quiet to walk on, it reduces noise around the home
- 7 Hygienic and approved by the National Asthma Council Australia's Sensitive Choice® Program
- 8 Really easy to clean, just use the Karndean Routine Cleaner
- 9 Doesn't require regular sealing or waxing & won't crack or chip
- 10 Adding borders and creating individual designs is easy and is not an expensive exercise

- Beautiful and natural. It's where Karndean Designflooring gets its inspiration
- Stone and wood temperatures can vary dramatically creating flooring that's cold or hot
- Both stone and wood can suffer from staining from food, wine and pet messes
- Wood is affected by indentation and wearing from foot traffic. Likewise stone can crack & chip
- Wood is affected by climate conditions and shrinks and contracts depending on the weather
- Both wood and stone surfaces can be noisy around the home
- Both wood and stone need to be sealed after installation
- Grouts get stained and dirty. Wood can require a steam mop
- Wood needs regular sealing and waxing, whilst stone is difficult to replace if chipped
- Borders are expensive to install and add excessive labour costs
